

Emergency Decision Unit Pathway

Flank pain

Date

DD/MM/YY

Patient details

Full name

DoB

Unit number

(use sticker if available)

Inclusion criteria	Adults awaiting CTKUB report as per ED tool ' Managing acute flank pain in adults '
Exclusion criteria	Atypical features as per box 2 of the ED tool ' Managing acute flank pain in adults '

Notes to clinician completing this pathway (ED senior to monitor)

- This pathway must only be used with the ED tool '[Managing acute flank pain in adults](#)'
- On the tool, ensure you have completed all details up to the point of transfer to EDU
- Prescribe appropriate medicines from the Nervecentre ED formulary; go to NC Meds > Emergency Medicine (ED)

EDU plan

- Manage pain and nausea as appropriate
- Once CTKUB has been reported, follow algorithm on the next page

Planned & agreed by

Print name

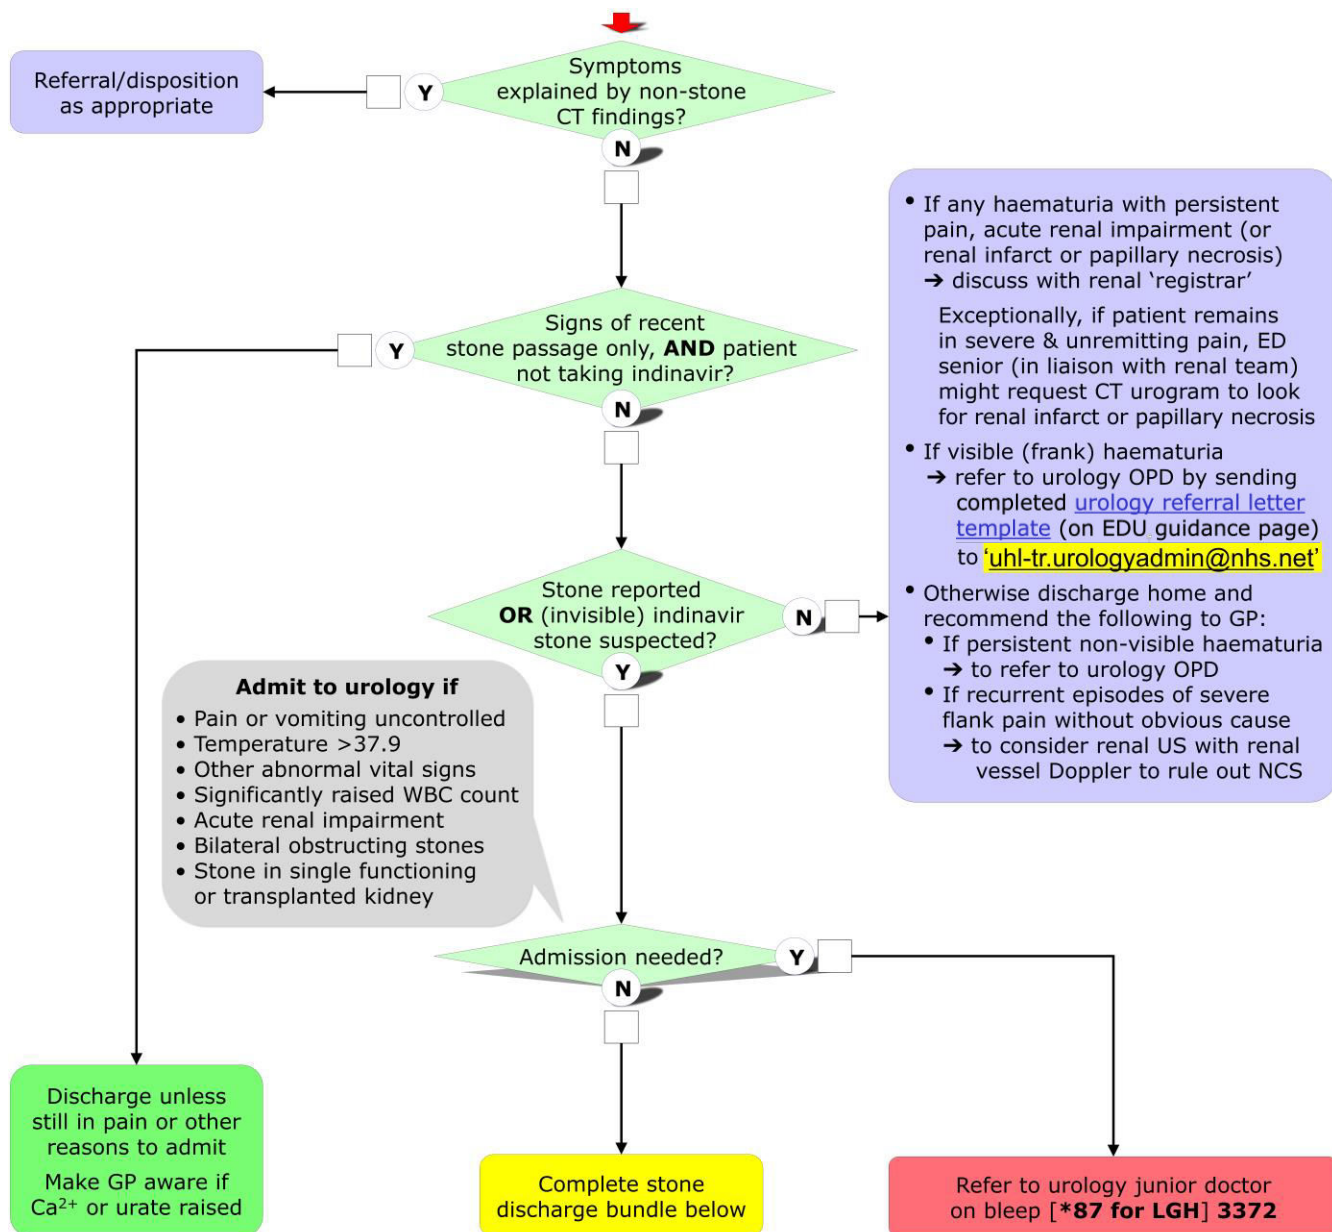

Signature

Referring Clinician

NB: Referring clinician must discuss this pathway with a consultant or the EPIC, who will record 'EDU admission approved' in the Nervecentre 'ED Flow Notes' field

EDU NIC does NOT accept patients without this

EDU flank pain management following CTKUB report

Stone discharge bundle

Arrange

- ☐ KUB X-ray before discharge (needed in every patient, for follow-up planning)
- ☐ Follow-up by completing ICE referral (Service Refs > Urology > Stone MDT); ensure Ca²⁺ and urate results available

Prescribe (**NB:** If TrustMed closed, use FP10)

- ☐ Diclofenac TTO 50mg PR or PO (patient's choice but PR route works faster) TDS regularly for 5 days then PRN for 2 days ☐ (tick red box if contraindicated)
- ☐ Tamsulosin TTO 0.4mg PO OD for 4/52 **IF** stone in distal ureter **AND** >5mm **AND** no contraindications as per BNF ☐ (tick red box if not needed or unsuitable)

Advise

- ☐ Taking regular Paracetamol as well
- ☐ Return to ED if they develop uncontrolled pain, fever or rigors, or urinary retention
- ☐ Accessing the BAUS (British Association of Urological Surgeons) Patients' Page '[I think I might have kidney stones](#)'

EITHER by searching online for '**baus patients kidney stones**'

OR by pointing their phone to this QR code
